## Eleganza sinuosa Sinuous elegance Élégance sinueuse

designed by **Giovanni Ingnoli**

**IT** La nuova sedia presidenziale, progettata da Giovanni Ingnoli, nasconde tecnologia all'avanguardia all'interno dell'eleganza sinuosa delle sue linee per massimizzare il comfort. Disponibile con schienale alto e medio, Synua è adatta non solo per le scrivanie presidenziali, ma anche per le sale riunioni. Synua è dotata di una base girevole a cinque razze con ruote e braccioli in alluminio.

**EN** The new executive chair, designed by Giovanni Ingnoli, conceals cutting-edge technology within the sinuous elegance of its lines to maximise comfort. Available in two configurations, with high or medium backrests, this chair is not only suitable for executive desks but also meeting rooms. Synua is fitted with a five-star swivel base with castors and aluminium armrests.

**FR** Le nouveau fauteuil direction, conçu par Giovanni Ingnoli, dissimule une technologie de pointe dans l'élégance sinueuse de ses lignes pour maximiser le confort. Disponible en deux configurations, avec dossier haut ou moyen, ce fauteuil convient non seulement aux bureaux présidentiels, mais aussi aux salles de réunion. Synua est équipée d'un piètement pivotant à cinq branches avec roulettes et accoudoirs en aluminium.

**IT** Dettaglio del bracciolo, disponibile in cinque finiture.

**EN** Detail of the armrest, available in five finishes.

**FR** Détail de l'accoudoir, disponible en cinq finitions.

**IT** La monoscocca ospita un meccanismo sincronizzato avanzato che consente allo schienale e alla seduta di muoversi secondo i movimenti del corpo. Questa tecnologia, che rende Synua ergonomica e adatta a ogni tipo di corporatura, è nascosta dalla tappezzeria e lascia quindi la seduta libera di esprimersi in forme raffinate.

**EN** The shell houses an advanced synchronised mechanism that enables the backrest and seat to move according to the body's movements. This technology, which makes Synua ergonomic and suited to every body type, is concealed by the upholstery and thus leaves the seat free to express itself in refined shapes.

**FR** La monocoque contient un mécanisme synchronisé avancé qui permet au dossier et à l'assise de suivre les mouvements du corps. Cette technologie, qui rend Synua ergonomique et adaptée à tous les types de corps, est dissimulée par la garniture, laissant ainsi le siège libre de s'exprimer dans des formes raffinées.

101 - High back padded executive chair

Features

- Fire retardant injected foam seat and backrest padding
- Flexible high backrest
- Self-balancing incorporated synchronized mechanism MS2AQ
- Aluminum armrests
- Ø65 mm self-breaking black castors for soft floors
